THE AAO, EXHIBIT #4110, TO
TAKE PART IN OUR 25TH BIRTHDAY
CELEBRATIONS.

FREE Laser Elbow Rests
Only at AAO 2010. See over for more details.

25 years of ophthalmic innovation

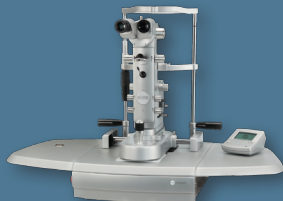

Over the past 25 years Ellex has evolved from a small scientific laser company to a global leader in ophthalmic laser and ultrasound technology. Today, more than 15,000 Ellex photodisruptors, photocoagulators and diagnostic ultrasound systems are in use around the world to diagnose and treat the leading causes of blindness.

And we think it's time to celebrate.

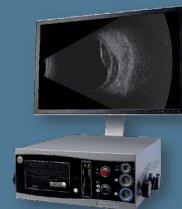

Join us at the Ellex exhibit #4110 to learn about our latest innovations in ophthalmology — including the new Integre Yellow™ 561nm yellow photocoagulator. And whilst you are at the Ellex exhibit, take part in a product demonstration to receive a free set of laser elbow rests.
